VPI QUALITY WINDOWS ADDS NEW HIGH PERFORMANCE GLAZING LINE

The Super Edge Series of Glazing™ enhances performance for various climates while increasing production capabilities

SPOKANE, WA –

VPI Quality Windows is pleased to announce a unique new series of glazing options for its entire line of window products. The Super Edge Series of Glazing™, manufactured by Cardinal IG, is designed to complement VPI Quality Window's stringent aesthetic, thermal, and seal durability requirements and create an array of benefits and energy savings for its customers.

"This is a dramatic extension of options for our wide ranging customer base", noted Burke Blevins, President of VPI. "By leveraging The Super Edge Series of Glazing™ with the energy performance of VPI Quality Windows, we have created one of the most thermally-efficient solutions on the market to address various climate zones and high building elevations."

"It also represents a significant expansion of production capacity and lead time reduction", adds Ken Modica, Vice President of Sales and Marketing. "With this line extension, VPI will be able to provide an infinite number of products in less time than ever before." Availability of Super Edge glass products will begin April 18th, 2011

ABOUT VPI Quality Windows
